

Quantitative Research Associate

Job Description

Salary range:	£31,016 - £35,369 per annum, plus benefits
Band:	5
Job type:	Full-time (37.5 hours)
Contract period:	Permanent
Reporting to:	Senior Quantitative Research Associate
Team:	Survey Coordination Centre in the Service Delivery Team
Location:	Oxford/hybrid (up to full time from home, in line with Picker's remote and home working policy)

About Picker Institute Europe

Picker is an Oxford-based charity with an international reputation as a key authority in the measurement and improvement of patient experience. Our mission is to make person-centred health and social care a reality for everyone.

Researching and measuring the experiences of patients, service users, and staff are key areas of our work. We develop and run surveys for a wide range of public and private healthcare organisations, as well as national bodies, voluntary sector organisations and international healthcare providers. Furthermore, we conduct original research using qualitative and quantitative social research methods to investigate issues related to people's experiences of care and organisations' efforts to improve services.

Service Delivery Team

Service Delivery provides tools and services that increase peoples' ability to understand, measure and act upon experiences of care in order to improve its quality. The team works with a wide range of stakeholders, including providers, national bodies, academic institutions, and charities to develop and implement evaluation and improvement programmes that help to deliver person centred care.

The vacancy is situated within the Survey Coordination Centre, which is responsible for managing the design, management and analysis of surveys within the NHS's national staff and patient survey programmes. The programmes are conducted on behalf of NHS England and the Care Quality Commission respectively, and include a range of large scale and high profile surveys that are typically coordinated centrally but administrated locally by NHS organisations. These surveys are amongst the largest of their kind in the world.

Purpose of the role

The successful candidate will report to a Senior Quantitative Research Associate and will work on the development and coordination of new and existing surveys as part of our Survey Coordination Centre in the Service Delivery Team. The post holder also disseminates results to various audiences, including clients, stakeholders, collaborators, and members of the public.

Duties and responsibilities

- Day to day project management of large scale national quantitative surveys including:
 - Designing surveys and questionnaires using a variety of tools, and methodologies
 - Assisting in designing questionnaires and survey instruments and testing as appropriate, including cognitive testing, to ensure that all new products meet and deliver needs of the client and target group
 - Assisting in designing sampling strategies for surveys, advising on and making recommendations about survey modes and testing methodological changes and innovations.
- Client Management including:
 - To ensure a full understanding of research requirements and that all commissioned projects are completed accurately and to agreed specification, standards and timescales, including:
 - daily liaison with the client, responding to queries (internal and external), monitoring project progress and completion of tasks to meet required deadlines, escalating concerns/ risks to the Senior Quantitative Research Associate as required, attendance at and contribution to client meetings.
- Collating, managing and checking very large data sets, resolving data queries, responding to enquiries, and monitoring progress, to ensure that data collated are accurate and of the highest standard
- Preparing and delivering results from commissioned projects to various audiences ensuring an understanding of the subject and issues arising and enabling informed decision making, including
- Producing written and numeric outputs (including but not limited to research reports, blogs, infographics, and trade press articles), including undertaking basic secondary analysis of survey and other data, and present evidence and findings about complex and sometimes contentious subjects to a wide range of audiences, ensuring an understanding of the subject and issues arising and enabling informed decision making.
- Assisting in preparing proposals, tenders and quotations, coordinating input from colleagues as required, ensuring that all documents are accurate and produced to agreed standards and timescales.
- Carry out desk research, including literature reviews and scoping studies based on academic publications and grey literature.
- Provide professional advice to colleagues, clients and partners, referring to the Senior Quantitative Research Associate (in the first instance) as necessary, to enable the organisation to successfully complete projects to the highest standards.

- Build and maintain relationships with new and existing clients, external stakeholders, partners and collaborators, to ensure the organisation understands its clients' current and future needs and clients remain up to date with the products and services available.

General Duties

- Contributing to the work of Picker as a whole by:
 - Fully engaging and participating in the achievement of Picker's aims and objectives
 - Developing new approaches, processes and methods to enhance Picker's performance
 - Promoting the sharing of knowledge and communications across teams within Picker; working closely with other teams to deliver projects and promote the use of survey findings.
- Ensuring compliance with all company policies, internal working practices and external regulatory requirements (e.g. Quality Assurance Framework, Data Protection Act, ISO 27001, ISO 20252, and MRS Code of Conduct).
- Other reasonable duties as requested by line manager.
